Materials for Electrochemical Energy Storage and Conversion II-Batteries, Capacitors and Fuel Cells: Volume 496 (Paperback)

Filesize: 9.38 MB

Reviews

These sorts of pdf is the greatest ebook offered. We have study and that i am sure that i will going to study once more once more in the future. Its been printed in an remarkably simple way and it is only after i finished reading through this pdf through which in fact transformed me, affect the way i believe.

MATERIALS FOR ELECTROCHEMICAL ENERGY STORAGE AND CONVERSION II-BATTERIES, CAPACITORS AND FUEL CELLS: VOLUME 496 (PAPERBACK)

DOWNLOAD PDF

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Our energy-hungry world increasingly relies on new methods to store and convert energy for portable electronics, as well as environmentally friendly modes of transportation and electrical energy generation. The development of high-performance power sources are intimately linked to the availability of advanced materials. Designing batteries and capacitors with higher specific energy and power, longer cycle life and rapid charge/discharge rates requires a deeper understanding of the relationship between materials properties and performance. Fuel cells, which offer the potential for clean, efficient conversion of chemical energy to electrical energy, are hampered by high cost and performance problems which can be resolved by new materials and processing techniques. Advanced batteries such as lithium-ion and nickel-metal hydride offer the potential for improved performance if low-cost materials can be developed. This book shares research and highlights the importance of materials in energy conversion technologies. Topics include: rechargeable batteries; lithium-ion rechargeable batteries - modelling; fuel cells; lithium-ion rechargeable batteries - cathode materials; battery electrolytes, interfaces and passive films; lithium-ion rechargeable batteries - anode materials and supercapacitors.
