EAE Jun 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x4 mm. This item is printed on demand - Print on Demand Neuware - El archipiélago Sabana Camagüey, ubicado en la zona norcentral de la Isla de Cuba es una de las áreas de mayor importancia para el desarrollo del turismo y economía del país. Está conformado por un conjunto de playas, paisajes y fondos marinos, y presenta una gran diversidad de especies de flora y fauna con un alto grado de endemismo. Unido a esto se destacan el valor de su patrimonio cultural, histórico y arqueológico (Acevedo, 1996). Su carácter insular tropical y su reciente evolución geólogo - geomorfológico, favorecen la riqueza y diversidad de la biota, la existencia de procesos marinos, eólicos y cársicos intensos, los cuales le confieren una elevada fragilidad y sensibilidad ecológica. Dicho carácter insular le confiere a los cayos e islas del archipiélago la categoría de áreas ecológicamente sensibles, donde se distinguen los ecosistemas de ecotono tierra-mar y los prelitorales o subcosteros de los cayos. En el mar, las áreas más sensibles son los arrecifes, sobre todo las crestas arrecifales y los pastos marinos en menor grado (Acevedo, 1996). 68 pp. Spanisch.
