Ethics and Emerging Technologies

By -

Palgrave Macmillan. Paperback. Book Condition: New. Paperback. 600 pages. Dimensions: 12.3in. x 9.1in. x 0.3in.Technology shapes every aspect of human experience and is the primary driver of social and environmental change. Given this, it is perhaps surprising that so little time is spent studying, analysing and ethically assessing new technologies. Occasionally, an issue attracts public attention for example, the use of human embryonic stem cells in medical research or the online file sharing of music and movies. However, these are the exceptions. For the most part, each new technology and application is enthusiastically embraced with little critical reflection on how it will impact peoples lives or the world. Moreover, when an issue raised by an emerging technology is attended to, the language, concepts and critical perspectives to properly address it are frequently found to be lacking. The aim of this textbook is to introduce students and other readers to the ethical issues associated with a broad array of emerging technologies, as well as to help them develop the analytical skills and perspectives necessary for effectively evaluating novel technologies and applications. The technologies discussed include nanotechnology, synthetic biology, robotics, genetic engineering, human enhancement, geoengineering, cultured meat, virtual reality, information technologies, sex...
