Ecco Press, United States, 2016. Paperback. Book Condition: New. Reprint. 203 x 135 mm. Language: English . Brand New Book. With a Foreword by Steven PinkerIn Tales from Both Sides of the Brain, Michael S. Gazzaniga tells the story of his passionate, entrepreneurial life in science and his decades-long journey to understand how the separate spheres of our brains communicate and miscommunicate their separate agendas. From his time as an ambitious undergraduate at Dartmouth, as a member of its now famed Animal House fraternity, and his life as a diligent graduate student in California to the first experiments he conducted in his own lab; from meeting his first split-brain patients and his collaboration with esteemed intellectuals across disciplines, Gazzaniga recounts the trajectory of his discoveries. In his engaging and accessible style, he paints a vivid portrait not only of his discovery of split-brain theory, but also of his comrades-in-arms the many patients, friends, and family members who have accompanied him on this wild ride of intellectual discovery. Wall Street Journal The personal story of a genius famous for one of the rare major discoveries ever made out in the still vast, still...
