Camera Lucidos, the Micro-Spectroscope and Micro-Polariscope, that is to apparatus which is coming to be used more and more in the higher fields of investigation in pure science and in practical medicine. It is thoroughly believed by the writer that simply reading a work on the microscope, and looking a few times into on instrument completely adjusted by another, is of very little value in giving real knowledge. In order that the knowledge shall be made alive, it must be made a part of the student s experience by actual experiments carried out by the student himself. Consequently exercises illustrating the principles of the microscope and the methods of its employment have been made an integral part of the work. In considering the real greatness of the microscope, and the truly splendid service it has rendered, the fact has not been lost sight of that the microscope is, after all, only an aid to the eye of the observer, only a means of getting a larger image on the retina than would be possible without it; but the appreciation of this retinal image, whether it is made...
